

# Improve your MANUFACTURING PERFORMANCE

Performance Services

Reduce Your Response Time

Eliminate Waste

Efficiently Increase Your  
Plant Capacity

Improve Your Manufacturing Performance

## Manufacturing Performance

Today's reality of a global marketplace is placing ever increasing cost pressures on manufacturers. The Createch Group understands these issues and has the expertise to help manufacturers get a grip on costs through reducing lead times, eliminating waste and by introducing Lean Manufacturing initiatives. Hands-on manufacturing know-how and the ability to transfer local knowledge to customers provides a winning combination to help manufacturers improve their performance and competitiveness.

## Manufacturing Performance Improvement

### Growth Management

- Manufacturing process analysis
- Manufacturing strategy development
- Production capacity growth
- Plant layout
- Dynamic simulation of operations (Flexsim)

### Enhance Competitiveness

- Lean manufacturing implementation
- Implementation of manufacturing cells and integrated assembly lines
- Improvement of equipment and production line efficiency
- Changeover/setup time reduction (SMED)
- Yield improvement
- Work measurement
- Theoretical and practical training
- Selection and implementation of manufacturing, packaging, material handling and storage equipment
- Equipment and production line automation

### Continuous Improvement

- The Comic-Strip Factory
- Kaizen
- Implementation of internal continuous improvement teams
- Performance assessment and management control data

## SHERPA™

A new and proven approach in continuous improvement is being fine-tuned at The Createch Group. Based on the operating system of Pratt & Whitney Corp., a world leader in continuous improvement, the Sherpa™ approach can be adapted to companies of all sizes and in all sectors, be it in manufacturing, distribution or service. Contact a Createch Group expert today to find out more.

## THE COMIC-STRIP FACTORY

An on-line learning tool to educate your employees about waste and added-value productivity techniques.

## FLEXSIM

Flexsim is the most powerful and flexible 3D simulation tool in a Windows environment available on the market. It offers the ideal solution for modeling a complete range of systems and processes, from manufacturing to transport, including warehousing and distribution.
