

Deploy an Enterprise Resource Planning System

Optimize Your Business Processes

Opt for an Accelerated Deployment Approach

Major Solutions Accessible to All

A Major Solution Accessible to all

Implementing a solution requires knowledge of best business practices, application expertise, and thorough project management capabilities. This is the framework that The Createch Group uses in its proven and comprehensive Oracle implementation methodology that consistently delivers results as quickly as possible for customers. Using this methodology, the Group has the capability to easily tailor and adapt the Oracle deployment to meet the needs of all organizations including small and mid-size enterprises. (SME's).

Project Assessment and Planning

- Needs assessment
- Project scope definition
- Total cost of ownership assessment
- Deployment strategy development
- Project planning
- Effort requirement assessment by the organization
- Evaluation of effort requirements

Oracle Business Solution Deployment

- Required technological infrastructure assessment, selection and implementation
